Regional Planning & Development**

- Unit I** Regional concept of geography, conceptual and theoretical framework, changing concept of regions, concept of space. Types of region; Formal and functional; Uniform and nodal single purpose and composite regions in the context of planning ; regional hierarchy.
- Unit II** Approaches to Delineation of different types of regions and their utility in planning. Physical. Physical regions, resource region, regional divisions according to variations in levels of socio-economic development; special purpose regions-river valley regions, metropolitan regions, problem regions tribal regions of droughts and floods.
- Unit III** Planning process – spectral, temporal and spatial dimensions; short term and long term perspectives of planning. Planning for regions development and multi-regional planning in a national context.
- Unit IV** Regional development strategies-concentration vs dispersal, case studies for plans of developed and developing countries; evaluation of regional plans of India. Indicators of development and their data sources, Measuring levels of regional development and disparities case study of India.

Unit V Concept of Multi-level planning; decentralized planning; peoples participation in the planning process; panchayat raj system rle and relationship of panchayati raj institution (Village panchayat, panchayat simiti and Zila parasid) and administrative structure (Village, Panchayat, block & district). Regional development in India – problems and prospects.
